Dear Dr

**Re: Refresher Aerospace Medicine Training for Designated Medical Examiners
in line Part 67 Civil Aviation Regulations and Technical Standards**

As you are aware, the SACAA is responsible for designating aviation medical examiners and ensuring that they meet the initial and refresher training (course or conference four yearly) requirements as prescribed in Part 67.00.4 of the Civil Aviation Regulations and Technical Standards. The initial and refresher training is also a requirement for the International Civil Aviation Organization.

The SACAA has identified a number of DAMEs who are due for the refresher in line with Part 67 regulations and its associated technical standards. The SACAA in consultation with the specialists are coordinating a refresher the Aerospace Medicine Course on the **28th June 2019.**

The total costs of the refresher and the venue of the course will be provided in due course.

Should you have any queries, kindly contact our office.

Yours Sincere
